WORK EXPERIENCE

Software Engineer
THG

Jan 2023 - present — *Bournemouth, England (remote)*

- Backend development in Java and Spring Boot, deployed on Kubernetes and Google Cloud Platform.
- Diagnose and fix production incidents.
- Test-first development and code review.

Associate Software Developer
JPMorgan Chase & Co.

Sep 2022 - Feb 2023 — *Bournemouth, England*

- Built more depth in Spring Boot while working on backend services in a banking environment.
- Hands-on exposure to Kubernetes and cloud deployment.
- Worked with production monitoring and observability.

Graduate Software Engineer
THG

Oct 2021 - Sep 2022 — *Salford, England*

- First professional work in Java and Spring Boot, on a large production system.
- Learned clean-code practices, code review and team delivery workflows.

Python Developer
Karza Technologies

Dec 2018 - Sep 2020 — *Mumbai*

- Responsible for building data pipelines across multiple web sources like BSE, NSE and electoral rolls via web-scraping using python
- Created over 300 web crawlers, harvesting millions of data points, thus creating end to end data pipelines for consumption
- Introduced in-memory download and re-upload of scraped PDFs reducing disk memory usage to a fraction of original

Software Engineer
Bombardier

Aug 2018 - Dec 2018 — *Vadodara, India*

- Responsible for developing web-hmi components for new metro trains

Software Engineer Intern
Symantec

Jan 2017 - Jun 2017 — *Pune, India*

- Built a crawler to collect files and their hashes for the most popular cloud-based software; gathered 1 million files to whitelist, hitting the target within 3 months
- Delivered a second crawler in record time for a time-sensitive, high-priority project
- Stayed on after the project to work with the team on development, across all stages of production

SKILLS

Java · Spring Boot · Python · Kubernetes · Google Cloud Platform · MySQL · Couchbase · MongoDB · TDD · JUnit · Clean code · SOLID · Code review

PROJECTS

All on github.com/sharanggupta

Orderly (work in progress)
Hexagonal architecture, one failing test at a time.

Flight search
Spring Boot REST API, hexagonal architecture, test-first.

EazyBank
Four Spring Boot microservices behind a gateway.

OAuth2 product
Resource server and client, built test-first.

Batch data migration
NoSQL to SQL with Spring Batch.

Thiasil
Next.js website for a glass-works client.

WRITING

OAuth2 with Spring Boot, a four-part series

Medium: sharanggupta.medium.com

EDUCATION

MSc Computer Science (Distinction)
University of Southampton

2020 - 2021

Dissertation: Modern Serverless Web Application Architecture

BTech Computer Science and Engineering
Symbiosis Institute of Technology, Pune

2014 - 2018

HACKATHON AND TEACHING

Smart India Hackathon 2018, Grand Finale
Built a solution to calculate trade margins for businesses (Ministry of Statistics and Programme Implementation problem statement).

Taught Android app development
To second-year MTech students, Symbiosis Institute of Technology (Mar-Apr 2017), as part of their IoT course.
